DVD-ROM is divided into a software disc and a data disc, and the software disc includes a driver. If you see the Microsoft Windows logo in the lower right corner, then the system has successfully completed downloading the Windows operating system and has begun installing it. Disc 1 contains the Windows operating system and driver for the computer system. If the Windows operating system was successfully installed, you may want to test the new operating system. Then, the system automatically updates Windows. Do not try to install it. If the Windows operating system does not start automatically, then the computer system cannot be installed. Additional comments on software You are not required to install or reinstall software after the new version is installed. If the computer system does not start, or the software does not start, then you should attempt to reinstall the software on the computer system by following the instructions included with the software. If the software or the Windows

operating system fails to install after the new software is installed, then the installation process will fail. In addition, you will be able to install software only when the computer system has a CD-ROM drive. Technical support Technical support involves providing assistance to computer users. It is provided by a trained technical support person. The service may be paid, and the technical support person may be a paid employee or an unpaid volunteer. The type of technical support that is provided by a technical support person depends on the type of computer system. Technical support is provided by the company that sold the computer system. Pay for technical support depends on the type of technical support service that is provided. For example, paid technical support is usually provided in return for a one-time fee that is charged before the technical support service is used. For paid technical support, the fee is charged after the technical support service is used. Unpaid technical support is free, and unpaid technical support is provided without any restrictions. Depending on the computer system, there are no technical support services. Availability of technical support If technical support services are available for the computer system, then the availability of technical support services is also dependent on the type of computer system. Depending on the computer system, there is either no technical support service, or it is available. During the technical support period, technical support is available in the United States. If technical support is unavailable, then you cannot use the computer system. Determining whether there is technical support 82157476af
